

## APPLICATION

For use where ambient noise levels are very low, and a high degree of silencing is required. This silencer is well suited for heavy duty stationary, marine, and mobile applications. The standardized A201-5100 is a more cost competitive offering than the legacy 201, while maintaining the integrity of the unit's performance and even lowering volume by an average of 31%.

## CONSTRUCTION

Heavy duty steel construction. Sizes 6" and below come standard with ID Cuff / OD Tube connections. Sizes 8" and above come standard with ANSI Flanged connections. Additional connections available. Call factory for details.

## FINISH AND OPTIONAL MATERIALS

High heat powder coat on sizes 12" and smaller, and high heat black paint on sizes 14" and larger. Silencers available in stainless steel, or with aluminized heads and shell - call factory for optional coatings.

Sizes 6" and below come standard with ID Cuff / OD Tube connections. Sizes 8" and above come standard with ANSI Flanged connections.

All spatial dimensions are in inches. Inlet sizes available up to 30.0 inches.

Additional connections available. [See Silencer Price Book pg. 48 for breakdown of A200 part number.](#)  
F MAX is for inlet only. H MAX is for outlet only. All weights are in pounds. All weights are approximate.  
Use diameter to find bracket sizes. Example: A201-5108 (20" dia) would require 28-2000 brackets (or similar 29 brackets).

**PRICES**

**FREIGHT:** Prepaid unless preapproved by GT Exhaust.

**TERMS:** Net 30 days.

Prices subject to change without notice. Restocking charge 25% / \$50 minimum.

Specialty items are non-returnable and non-refundable.

Minimum order size \$50. All prices are in US Dollars.
